

File Pre-DICT via Traxon Global Security (TGS)

What is Pre-Departure Information for Cargo Targeting (Pre-DICT)?

Pre-DICT is a security compliance program introduced by the United Kingdom Home Office. In July 2020, the UK Home Office called for voluntary participation in its Preloading Advance Cargo Information (PLACI) air cargo security program to submit cargo data to the UK Home Office prior to loading shipments on to an aircraft transiting through or destined for the UK.

When will Pre-DICT take effect?

UK Home Office is currently piloting their Pre-DICT program, which requires airlines to submit shipment details prior to loading.

What do I need to do to be compliant with Pre-DICT?

Under the new UK Pre-DICT rules, it will soon be mandatory for carriers flying cargo into the UK (both as a destination and in-transit) to file 7+1 data elements with the UK Home Office. Carriers are not the only ones affected by this regulation. Pre-DICT poses challenges to forwarders as well, as most of the 7+1 data must be collected well before shipments reach the warehouse. Both forwarders and carriers are responsible to collect and submit the proper information or potentially face delays. While carriers are held responsible, forwarders are also able to file for security clearance - something already taken up by many larger freight forwarding companies.

How can Traxon Global Security (TGS) can help?

The Pre-DICT filer only needs to send their FWB, FHL & FFM via CHAMP Traxon Global Security (TGS) and TGS takes care of the rest - connecting to Transport Canada and filing the correct security messages on time.

How do I find out more?

Just contact your local CHAMP Service or Sales Manager or marketing@champ.aero for more details or to sign up for TGS.
